Unleash the Power of Collaborative Cybersecurity with Trellix and Expel

Expel at a glance:

Swift setup and real-time insights

- Onboard in hours instead of weeks—unlike other MDR providers

- Leverage your existing security technology, including direct integration with Trellix HX

- Get insights identical to those provided Expel's SOC analysts

Rapid response times

- Achieve a mean alert-to-triage time of three minutes for critical alerts

- Achieve a mean alert-to-fix time of 22 minutes or less for critical alerts

The Rising Demand for Robust Cybersecurity

In an era marked by escalating cybersecurity threats, organizations of all sizes and industries grapple with a daunting challenge: how to secure their digital assets against ever-more sophisticated attacks. The necessity for a comprehensive, proactive, and adaptive security solution has never been more urgent.

Enter Expel® Managed Detection and Response (MDR) combined with Trellix. Experience unparalleled 24x7 monitoring and swift response mechanisms, while ensuring a seamless integration with existing tech and a focus on business-aligned security outcomes. This comprehensive MDR platform and service approaches security operations in an entirely new way, which allows for even more value from your existing tech stack. It offers a versatile MDR approach that's tailored to your organization's unique needs, maximizing the value delivered to you.

Expel MDR: Partnering with Trellix

Expel, a recognized leader in the Forrester Wave™ for MDR, collaborates seamlessly with Trellix. Trellix performs fast, targeted forensic investigations across thousands of endpoints. This partnership delivers comprehensive cybersecurity services, bridging the cybersecurity skills gap. Designed to elevate the security maturity of organizations, it ensures consistent protection against sophisticated cyberthreats.

Expel MDR provides 24x7 detection and response across clouds, Kubernetes environments, SaaS applications, and on-premises devices, such as endpoints, networks, and SIEMs. Through a software-driven approach, Expel eliminates the noise and prioritizes what matters to the business—with speed, accuracy, and transparency. This partnership takes everything you love about Trellix and couples it with Expel MDR to detect, enrich, and resolve incidents even sooner.

Expel at a glance:

Scalability and shared responsibility

- Scale threat management as your needs and organization evolves

- Share the responsibility and costs of a full-time SOC

- Focus your team on its core competencies instead of alerts

Optimized resources and budgeting

- Gain predictability in budgeting

- Benefit from specialized expertise for resource optimization

Take the next step toward living security with MDR:

Managed Detection & Response

By choosing a partner-driven approach, Trellix and Expel provide you with:

- **Enhanced staffing resources:** Leverage the expertise of Expel to bolster cybersecurity operations and offset any staffing limitations your in-house teams may have

- **Ability to adapt to your unique needs:** Employ a flexible platform that integrates with your existing security technologies, providing a personalized and effective cybersecurity solution without a rip-and-replace model

- **Deepened tool knowledge:** Benefit from Trellix's telemetry, threat intelligence, and advanced tooling to enhance Expel's understanding and effectiveness in dealing with threats

- **Expand Trellix capabilities:** Establish a tight feedback loop with Expel on detections, workflows, and advanced features; further strengthening Trellix's competencies

- **Tailored delivery:** This collaboration offers threat detection and response, with transparency and the ability for your security team to be involved as much or as little as makes sense.

Unleash the Power of Collaborative Cybersecurity

The average organization faces thousands of security events daily, employing between 60-80 security tools. On average, it takes 280 days to identify and contain a breach. This data underscores the critical need for a robust cybersecurity solution like Trellix and Expel MDR. The collaboration between Trellix and Expel provides real-time threat detection, swift incident response, and valuable threat intelligence, tailored to your unique risk profiles and compliance requirements.

Ready for Superior Cybersecurity?

Don't let the complexity of today's threat landscape undermine your organization's security. Harness the combined power of Trellix and Expel MDR to strengthen your security posture, minimize the impact of threats, and protect your business continuity.
